DETAILED ACTION

This communication is in response to Applicant's amendment filed on December 27,
 Rejections made under 35 USC 112, second paragraph in the last office action are
 withdrawn in view of the persuasive arguments. Claims 27-61 are pending in this application.

Allowable Subject Matter

- 2. The following is a statement of reasons for the indication of allowable subject matter:
- 3. The prior art of record (Ferguson et al US Patent 6,064,984 in view of Brown et al, The Accounting Review July 1979) teaches a computer-implemented system, including a user interface for use with a database of historical data relating to predictions from a plurality of sources relating to securities, the user interface comprising a module for viewing the historical data; wherein at least some of the plurality of sources comprise security analysts and the predictions comprise security analysts' earnings estimates.

Even though, the prior art of record teaches the above mentioned steps, the prior art of record fails to teach a computer-implemented system, including a user interface for use with a database of historical data relating to predictions from a plurality of sources relating to securities including the step wherein the historical view module displays simultaneously, for selected sources, a time series of earnings estimates for each selected source, for a predetermined period, for a predetermined earnings event, and the actual reported earnings for the predetermined earnings event and at least one graphical user interface object for selecting at least sources and an earnings event. For these reasons claims 27, 35-38, 42-44 and 51 are deemed to be allowable over the prior art of record, and claims 28-34, 39-41, 45-50 and 52-61 are allowed by dependency.
